

**TITLE: OTIC MALAKOPLAKIA**

**Name:** Javier Dueñas

**Affiliation:** Otorhinolaryngologist

**Country:** Perú

**Email ID:** [Jav\\_duens@hotmail.com](mailto:Jav_duens@hotmail.com)

**ABSTRACT**

Malacoplakia is a rare granulomatous disease of uncertain etiology that affects immunosuppressed individuals, is related to inflammatory processes, generally bacterial, and appears to be a defect in the phagocytic function of histiocytes. Its diagnosis is histological and the treatment must combine surgical excision, antibiotic therapy and the limitation of immunosuppression.

**BIOGRAPHY**

Javier Dueñas has completed his university studies as a doctor in the country of Peru at the age of 25, he trained as an otorhinolaryngologist in the country of Cuba at the age of 35 with a vision focused on otology. His passion for otology has led him to carry out many searches and compilations that day by day increase his knowledge.
